Applicants provide a set of formal drawings to satisfy the statutory requirements. If the Office does not believe that these replacement drawings are in compliance, Applicants request that the Office so indicate. Regarding Figure 12, Applicants submit a substitute Figure 12 which underlines those amino acid sequences present in the Complementarity Determining Regions (CDRs) of the heavy chain variable region and the light chain variable region. These underlined amino acids are those encoded by the CDR nucleic acid sequences which were originally underlined. As such, the content of the CDRs in Figure 12 has not been altered.

Moreover, revised Figure 12 consolidates the SEQ ID NOS. in the original figure down to 4 SEQ ID NOS. Applicants have not introduced any new matter, as the content of Figure 12 has not changed substantively. The following table correlates the SEQ ID. NOS. in revised Figure 12 with those in the original figure.

New SEQ ID NO.	Previous SEQ ID NOS.	Identity of the Sequence
86	86, 88, 90, 92, 94	nucleic acid sequence of 96-110 heavy chain variable region
87	87, 89, 91, 93, 95	amino acid sequence of 96-110 heavy chain variable region
88	96, 98, 100, 102, 104	nucleic acid sequence of 96-110 light chain variable region
89	97, 99, 101, 103, 105	amino acid sequence of 96-110 light chain variable region

Applicants also submit a replacement Sequence Listing, which reflects the changes described above for Figure 12. Both this Sequence Listing and revised Figure 12 were filed in the parent application (09/097,055).

Please grant any extensions of time required to enter this amendment and charge any additional required fees to our deposit account 06-0916.
